

## Good national governance for sustainable active mobility

Hall 5, Level +1
Thursday, 1 June 2017
16:30 - 18:00

What is best practice, what are the barriers in national/federal governance for walking and cycling, the primer sustainable active mobility modes? Good infrastructure and services for pedestrians and cyclists are an essential part of sustainable mobility for all – worldwide.

Walking and cycling are reflected well in the New Urban Agenda as adopted at the Habitat III conference by the UN in Quito in 2016. Good conditions for walking and cycling are essential for sustainable mobility for all (see the World Bank Project Sum4all). The EU is developing currently an Urban Agenda for the EU, where urban mobility is one of the themes.

Five Experts from five different countries (United States, United Kingdom, Germany, Denmark and the Netherlands) share their knowledge, debate and discuss with the audience about good national/federal governance for sustainable active mobility. All speakers are involved in the international exchange of knowledge about what works best in national policies and funding to promote walking and cycling.

## **Speakers:**

 Holger Dalkmann (Director, Strategy and Global Policy, EMBARQ Director, WRI Ross Center for Sustainable Cities, USA): Best practice and barriers in national/federal

governance for sustainable active mobility

- Burkhard Stork (ADFC, CEO, Germany): Federal funding and support for cycling the German case
- Bronwen Thornton (Walk 21, Development Director, United Kingdom): National Frameworks for walking: an overview of best practice
- Klaus Bondam (DCF, CEO, Denmark): A Danish success story about national funding and municipal cooperation for more bicycle infrastructure
- Saskia Kluit (Fietsersbond, CEO, The Netherlands): The Dutch National Tour de Force for cycling

Moderator: Bernhard Ensink (ECF, Belgium)
